

SAFE HEART Women Study Participant Information

the Social determinAnts oF the risk of HypERTension Study in WOMEN

Thank you for your interest in the SAFE HEART Women Study!

The SAFE HEART Women study is focused on learning about younger women at risk for high blood pressure and heart disease who haven't traditionally been apart of studies about heart health.

This study will help us learn more on how risks for high blood pressure and heart disease are impacted by social factors (like where you live or work) and understanding of heart health (called heart health literacy). And if heart health education improves this understanding.

Participation in the SAFE HEART Study includes:

- Screening for heart health risk factors
- Receive education and resources tailored towards women's heart health
- Compensation up to \$50 in gift cards

Eligibility requires:
